```
No. is the number of results predicted by chance to have a greater than or equal to the score of the result being printed, s derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     1 ADRERSIHDFCLVSKVVGRC.....ACMLRCFRQQENPPLPLGSK 170

-I- SUBUNIT: INTER-ALPHA-TRYPSIN INHIBITOR CONSIST OF A LIGHT CHAIN AND AN HEAVY CHAIN. THERE ARE THREE DIFFERENT HEAVY CHAINS.

-I- PTM: THE PRECURSOR IS PROTECLYTICALLY PROCESSED INTO TWO SEPARATELY FUNCTIONING PROTEINS.

-I- PTM: HC CONTAINS A COVALENTLY LIGHT BROWN-YELLOW CHROMOPHORE.

-I- PTM: ADDITION OF GLYCOSAMINGGLYCAN CHONDROITIN SULFATE, ALLOWS CROSS-LINKING BETWEEN THE DIFFERENT COMPONENTS.

-I- CROSS-LINKING BETWEEN THE DIFFERENT COMPONENTS.

-I- MISCELLANEOUS: IN VITRO, THE FIRST TWELFUR RESIDUES OF THE AMINO INHIBITING THE ACTIVITY OF A NUMBER OF ENZYMES. ITS IN VIVO FUNCTION IS NOT KNOWN

-I- SIMILARITY: IN THE N-TERMINAL SECTION; BELONGS TO THE LIPOCALIN FAMILY.

Chem. Hoppe-Seyler 366:473-478(1985).

-:- FUNCTION: THIS INHIBITORY FRAGMENT, RELEASED FROM NATIVE ITI AFTE LIMITED PROTECLYSIS WITH TRYPSIN, CONTAINS TWO HOMOLOGOUS DOMAINS WHEREAS THE SECOND DOMAIN IS A STRONG INHIBITOR OF TRYPSIN, THE FIRST DOMAIN INTERACTS WEAKLY WITH PAN-GRANULCYTIC ELASTASE AND NOT AT ALL WITH PANGREATIC ELASTASE.

NOT AT ALL WITH PANGREATIC ELASTASE.

-i- MISCELLANEOUS: THE AMINO ACID AT POSITION P2' (17) APPEARS TO DETERMINE THE SPECIFICITY OF THE INHIBITION OF DOMAIN I.

INHIBITORS WITH METHIONINE IN THIS POSITION INTERACT WEAKLY WITH CHYMOTRYPSIN AND ELASTASE; THOSE WITH LEUCINE INTERACT STRONGLY.

IT APPEARS NOT ONLY AS A FREE MONOMER BUT ALSO IN COMPLEXES WITH 1 AND ALBUMIN (BY SIMILARITY).

FUNCTION: INVER-ALPHA-TRYPSIN INHIBITOR, PRESENT IN PLASMA AND URINE, INHIBITS TRYPSIN, PLASMIN, AND LYSOSOMAL GRANULOCYTIC ELASTASE (BY SIMILARITY).

PIM: THE PRECURSOR IS PROTEOLYTICALLY PROCESSED INTO TWO SEPARATELY FUNCTIONING PROTEINS.

PIM: HC CONTAINS A COVALENTLY LINKED BROWN-YELLOW CHROMOPHORE (BY SIMILARITY).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             European Bioinformatics Institute.
